

> Jesse Durkee

IT Solutions Architect | Cybersecurity | Zero Trust | Blue Team Operations

IT Solutions Architect specializing in Zero Trust, hybrid identity, Blue Team operations, and endpoint defense

~/ West Bend, WI resume@error404.net linkedin.com/in/jessedurkee github.com/Error404-net

:: PROFILE

- > IT Solutions Architect with 20+ years spanning MSP service delivery, infrastructure operations, small-business leadership, and U.S. Army service.
- > Designs and delivers Zero Trust, hybrid identity, endpoint defense, network security, backup, and Microsoft 365 improvements for small and midsize organizations.
- > Blue Team practitioner experienced in security monitoring, alert triage, investigation, endpoint containment, remediation, recovery coordination, and post-incident response.
- > Modernizes legacy environments into synchronized Entra ID / Azure AD hybrid identity using Conditional Access and identity-protection strategies.
- > Builds repeatable incident-response playbooks, operational runbooks, measurable SOPs, and AI-assisted workflows that improve consistency and audit readiness.

:: TECHNICAL SKILLS

Cybersecurity and Blue Team: security monitoring · detection and investigation · incident classification · endpoint containment · eradication and remediation · recovery coordination · post-incident review · lessons learned · vulnerability management · incident-response playbooks

Identity and Zero Trust: Microsoft Entra ID · Azure AD · Azure AD Connect · Conditional Access · identity protection · hybrid identity modernization · Microsoft 365 · policy-based access · Active Directory

Endpoint and network defense: Datto EDR · Microsoft Intune · endpoint hardening · patch automation · secure imaging · automated remediation · SD-WAN · VPN · VLAN segmentation · DNS filtering · firewall hardening · Cloudflare · traffic forwarding

Infrastructure and resilience: Windows Server · VMware ESXi · Hyper-V · Proxmox VE · Linux · hybrid cloud infrastructure · Docker · backup and disaster recovery · monitoring and alerting

MSP service delivery: Autotask PSA · IT Glue · Datto RMM · ticket triage and escalation · SLA management · vendor escalation · client communication · technician mentoring · lifecycle management

AI engineering and automation: local model inference · edge AI deployment · Ollama · multi-provider model APIs · API integration · AI agents · agent tool use · Model Context Protocol (MCP) server development · workflow automation · prompt and context design

Automation, web, and delivery: PowerShell · Bash · REST APIs · JSON/YAML · Git · GitHub Actions · CI/CD workflows · HTML · CSS · JavaScript · Cloudflare · runbook automation · SOPs · audit readiness · training enablement

:: PROFESSIONAL EXPERIENCE

IT Solutions Architect

Collett Systems LLC · West Bend, WI

Jul 2021 – Present

- > Lead infrastructure and cybersecurity delivery across Microsoft 365, Windows Server, hybrid identity, endpoint defense, networking, backup, and hybrid environments supporting several hundred users across multiple clients and sites.
- > Modernize legacy Active Directory into synchronized Entra ID / Azure AD hybrid identity and implement Zero Trust architecture with Microsoft Entra ID, Conditional Access, and identity-protection strategies.
- > Lead Datto EDR deployments and develop automated incident-response and remediation playbooks to improve threat containment and response consistency.

- > Triage security alerts, investigate suspicious activity, contain affected endpoints, coordinate remediation, document recovery actions, and capture lessons learned.
- > Administer Microsoft Intune endpoint-management processes, including hardening, patch automation, secure imaging, and remediation.
- > Design and implement SD-WAN, VPN, VLAN segmentation, DNS filtering, firewall, wired, wireless, and multi-site network improvements.
- > Implement Microsoft Global Secure Access capabilities, including Entra Private Access and traffic forwarding for policy-based remote access and inspection.
- > Build operational runbooks, knowledge bases, technical documentation, and measurable SOPs for onboarding, training, audit readiness, and consistent service delivery.
- > Administer Autotask PSA ticket workflows and IT Glue documentation standards, improving escalation context and knowledge reuse.
- > Apply PowerShell, Bash, REST API integration, and structured JSON/YAML configuration to automate repetitive operational work and make changes repeatable.
- > Deploy AI at the edge using locally hosted models; integrate multiple model providers through APIs; build agent workflows and MCP servers that connect AI systems to operational tools and data.
- > Contribute to monitoring, vulnerability management, patching, backup, disaster recovery, root-cause analysis, and infrastructure lifecycle planning.
- > Coordinate clients, technicians, vendors, and service-management processes from issue identification through implementation.

Manager and Lead Technician

Dan Frank Upholstery Inc. · Oconomowoc, WI

2000 - Jul 2021, excluding active-duty service

- > Directed daily operations, scheduling, customer work, vendor coordination, inventory, quality control, and work-order execution.
- > Progressed from apprentice to upholsterer, lead technician, and manager while maintaining delivery standards and customer relationships.
- > Digitized work-order tracking and safeguarded customer specifications through disciplined process and information management.
- > Coordinated competing priorities, communicated trade-offs, trained staff, and kept work moving from intake through completion.
- > Built transferable leadership, vendor-management, process-control, and client-service experience applicable to technical operations and security program management.

Infantryman and Assistant Company Armorer

United States Army · Fort Carson, CO

Oct 2005 - Jul 2009

- > Maintained 100 percent accountability for approximately \$2 million in armory assets during redeployment and routine operations.
- > Maintained inventory versions and accountability records for arms-room assets, supporting compliance, auditability, and readiness.
- > Supported mission planning, vehicle mobilization, and missions including Operation Murfreesboro.
- > Completed 40 hours of Combat Lifesaver training and provided first-response support capability.
- > Coordinated people, equipment, safety, readiness, and mission requirements under pressure.

:: SELECTED CYBERSECURITY AND INFRASTRUCTURE PROJECTS

Hybrid Identity and Zero Trust Modernization

Modernized legacy Active Directory into synchronized Entra ID / Azure AD hybrid identity and implemented Conditional Access-based Zero Trust controls.

Blue Team Endpoint Defense and Response

Led Datto EDR deployment, endpoint hardening, patch automation, secure imaging, automated remediation, and incident-response playbook development.

Edge AI and Agent Tooling

Deploy locally hosted models at the edge, integrate multiple model providers through APIs, and build agent workflows and Model Context Protocol (MCP) servers for tool-connected AI operations.

Web Development and Edge Delivery

Develop and maintain content-driven websites and technical web experiences using HTML, CSS, JavaScript, Git, GitHub Actions, and Cloudflare for source control, automated delivery, and edge-hosted service delivery.

Overlay Networking

Implemented Entra Private Access and traffic forwarding to support policy-based remote access and inspection. Additionally deployed other vendors such as Tailscale, Zerotier.

Documentation and Response Enablement

Standardized technical documentation, knowledge bases, operational runbooks, measurable SOPs, onboarding, and training to improve service consistency and incident-response readiness.

Multi-site Network Defense Modernization

Designed wired, wireless, SD-WAN, VPN, segmentation, DNS, firewall, and redundancy improvements for distributed client environments.

:: EDUCATION

Associate of Applied Science, Information Technology - Cybersecurity Specialist

Moraine Park Technical College · West Bend, WI

High Honors · May 2024

Focused on network defense and secure infrastructure design.

:: CERTIFICATIONS AND LICENSES

- > **Certified 5G LAN Specialist** · Certified Wireless Network Professionals · Apr 2025
- > **Dropbox Certified Administrator** · Dropbox · May 2025
- > **Amateur Radio Technician License** · Federal Communications Commission · KD0FKF
- > **Certified ICT Protege GX Installer, Level 1** · Integrated Control Technology · 2023

:: SPEAKING

Cyphercon 9 · 2026

Netscape, Dial-Up, and Data Breaches: Browser Risk Then vs. Now

:: MILITARY RECOGNITION

Army Commendation Medal · Army Achievement Medal · Army Good Conduct Medal · Combat Infantryman Badge

:: COMMUNITY LEADERSHIP

- > **Cub Scouts:** Den Leader, Assistant Cubmaster, Committee Member, and Pinewood Derby Coordinator · 2023-present
- > **Memorial Go Carts:** Team Glitch Owner and Marketing Committee Member · 2025-present
